Metalline Mining Company announces new drilling results

Coeur d'Alene, Idaho -- Metalline Mining Company (Amex: MMG) announces new results from its exploration drilling at Sierra Mojada, Mexico.

Analytical results from diamond drill core samples from Sierra Mojada were recently received by Metalline Mining Company from ALS Chemex Laboratory, Vancouver, Canada. Hole D1071124, drilled to the south at a 75 degree angle upward from drill base E5 in the Encantada mine, intersected 6 meters averaging 440 grams silver per tonne, 0.17% copper, 11.8% zinc, and 3.0% lead. The interval is located in the silver rich polymetallic manto in limestone just below the San Marcos conglomerate. The mineralized interval is believed to have a true thickness of about 5 meters.

This stratigraphic interval is historically known as the "contact ore bodies" and has been productive for high grade silver-bearing ores, such as the San Jose and Veta Rica mines. To the best of our knowledge there has been no previous mining in the area of this intercept. Previous drill holes in this area were drilled with reverse circulation methods to evaluate the deeper oxide zinc potential. The results from these holes are unreliable due to less than acceptable sample recovery percentages, but suggest the presence of a larger, high-grade mineralized body in the area. The depth from the surface to the top of the zone detected in the core hole is about 75 meters.

An offset hole is currently being drilled to confirm the results of hole D1071124 and Metalline intends to further test this area and other targets by drilling from the surface and underground in the 2008 polymetallic manto drill program.

Metalline Mining Company is an exploration stage enterprise engaged in the business of mining. The Company currently owns mining concessions in the municipality of Sierra Mojada, Coahuila, Mexico. The Company conducts its operations in Mexico through its wholly owned Mexican subsidiaries, Minera Metalin S.A. de C.V. and Contratistas de Sierra Mojada S.A. de C.V. Forward-Looking Statements

This news release contains forward-looking statements regarding future events and Metalline's future results that are subject to the safe harbors created under the Securities Act of 1933 (the "Securities Act") and the Securities Exchange Act of 1934 (the

"Exchange Act"). These statements are based on current expectations, estimates, forecasts, and projections about the industry in which Metalline operates and the beliefs and assumptions of Metalline's management. Words such as "expects," "anticipates," "targets," "goals," "projects," "intends," "plans," "believes," "seeks," "estimates," "continues," "may," variations of such words, and similar expressions, are intended to identify such forward-looking statements. In addition, any statements that refer to projections of Metalline's future financial performance, Metalline's anticipated growth and potentials in its business and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, including those identified elsewhere herein and Metalline's Annual Report on Form 10-KSB for the fiscal year ended October 31, 2007 under "Risk Factors." Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. Metalline undertakes no obligation to revise or update any forward-looking statements for any reason.
